

## Training M2W1

Adrian Andres Gutierrez Regino

### Objective

Research a job or occupation and make a presentation about its responsibilities, required skills and the importance of that job.

¡Hello everybody!

I'm Adrian Gutierrez and will talk to you about one of my dream's jobs. I would like to become a mechanical engineer at Relianz Mining Solutions. I would work there as a maintenance engineer, my functions there will be keep on track heavy machines preventive maintenance plans, manage performance KPI's and program machines repairings. In this job I will develop problem-solving, logic thinking and equipment monitoring skills.

In the society, is very important the mechanical engineer role, because if there were not this job, we could not have all the machines we know like cars, airplanes, air conditioners, and many others you can't imagine.

Why is this my dream job? Because it will give me the opportunities to work abroad, do a career plan in the company to scale some positions and of course to grow up and be an excellent engineer.
